BOOK SYNOPSIS

Comprehensive, Rigorous Prep for the ACT Every year students pay \$1,000 and more to test prep companies to prepare for the ACT. Now you can get the same ACT preparation in a book. ACT Prep Course provides the equivalent of a 2-month, 50-hour course. The ACT is challenging but it can be mastered through hard work, analytical thought, and by training yourself to think like an ACT test writer. Many of the exercises in this book are designed to prompt you to think like an ACT test writer. For example, in the math section, you will find Duals. These are pairs of similar ACT problems in which only one property is different. They illustrate the process of creating ACT questions. Features: * Math: Twenty-seven chapters provide comprehensive review of ACT math. * Reading: Develop the ability to spot places from which questions are likely to be drawn as you read a passage. (pivotal words, counter-premises, etc.) * Science: Fifteen chapters provide complete review of the basics of ACT science. * Mentor Exercises: These exercises provide hints, insight, and partial solutions to ease your transition from seeing ACT problems solved to solving them on your own. * Performance: If your target is a top score, this is the book!
