- ISBN : 9070987058

BOOK SYNOPSIS

The new, revised, and complete edition of the classic standard work on the worlds bayonets, combining all original four volumes into one book. With detailed drawings (original drawing numbers preserved) and information on more than 1000 bayonets and scabbards, it is organized alphabetically by country, and with indices on length as well as on markings and manufacturers. The most important difference between the original 4 vol. set is the classification of the information. Originally classed by overall length, this edition is arranged into nationality chapters, depicting and describing the bayonets by the end-users country-- not the manufacturer.
